_____

Hello'

  I have some difficulties with AGWA 2 for ArcGis 9.1. When i tray to use Parameterizer Options
Element Parameterizer i got the next error: "FromParameterizerElements.New()
Error HRESULT E_FAIL has been returned from a call to a COM component".
  I press ok and then it open a new window. I put the specific file on the discretization, i press process
and then i get a new error: "FromParameterizerElements._parameterizerElements_PercentDone()
    Index was aut of range. Must be non-negative and less than the size of the collection.
  Parameter name: index." , and then the program is blocked.

Note: I use data from "sanpedro tutorial".

How I could resolve that?
Thank you.

_____

Let me check into that, I haven't seen that error before.
